

What People Are Saying About CoolWorks™

'I purchased 2 pairs to wear instead of the pants I am supplied with. On those brutally hot and humid days in the summer, when the end of our shift arrives, all of my coworkers are spent. But with my CoolWorks, I am still feeling good enough to take on the overtime hours available at that time. The pants have paid for themselves within days!'

T.G., City of Toronto Garbage Collection

"The convertible properties of the pants make warmer or cooler workplace temperatures a non-issue. My work crews are always comfortable and look much more professional on the job site."

P.L., Owner, Hub Installations, Copetown, ON

"We are allowed to wear shorts at work, but even when it's hot in the plant most of us wear long pants. It's just too risky NOT to have your legs covered. These pants definitely give you the best of both worlds."

K.W., Camco Inc., Hamilton, ON.
Camco Inc. is a 600 employee manufacturer of GE and Hotpoint appliances

'I have been wearing the pants for over a year now, and actually find them to be even cooler than the shorts I have, when I am on the tarmac. The pants prevent the direct sun from beating down on me, while still allowing the cool breeze to flow through. The extra visibility and protection are outstanding features, as well.'

P.S., Cargo Jet, Hamilton

"I wear mine year round. The roominess (of the pants) that makes them so cool in the summer allows me to layer up underneath them when working outside in the winter. I don't need to buy anything else."

C.B., Owner, CBC Contracting, Alberton, ON

"This place gets unbearably hot in the summertime. I won't wear anything else now."

B.N., Machine Operator, El-Met Parts Inc., Dundas, ON
